

What is Telecom Expense Management?

If it rings, or connects to the Internet, we make it cheaper.

Most firms pay too much for their voice, wireless and data services. Telecom Expense Management, as an industry, evolved to address this problem.

We do the overall expense monitoring and continuous spend reduction of landlines, walky, toll-frees, mobiles, Internet and wireless services.

Shrink Phone & Telecom Bills by upto 33% or more

Never knew I could shrink my Telecom costs drastically!

-Ashwin Desai, Director, A&T

A penny saved is a penny earned.

A quick quiz

- How many bills does your organization pay in telecom?
- What is the average communications expenditure per location/site?
- What is the average and total mobile expense per employee in a quarter?

Research shows that more than 50% of the companies do not know how much is being spent on telecom and IT services.

How can you manage costs that you cannot identify?

Only if we save, we earn.

Companies are spending anywhere between INR 1 lakh to 1 crore a month on various forms of telecom services.

What if you could reduce this expenditure by 25% ~ 33% or even more -- and would not be charged anything except a percentage of the savings for your company?

We at Intellibuzz do just that.

No hidden costs, No out-of-pocket expenses, No initial investments.

We work on a contingency-based pricing structure also.
